

MAINTENANCE

Empty dust cup after each use

TIP:

Wash filters to keep the suction strong. Rinse filters and allow to air-dry completely. Tap loose dirt from foam filters as needed between washes. See enclosed instructions for complete details on removing and cleaning filters.

Access brushroll and Soft Roller

1. Use a coin to unlock the 3 locks on the bottom of the floor nozzle, a portion of the base is removable to allow for better access to the brush roll and exposure to the airway. Shine a torch from the bottom to check for possible blockage in the airway.
2. Clear away any objects or debris.
3. To reassemble, replace base by lining it up along the front of the nozzle. Push down to snap into place. Lock the 3 locks. If Brushroll Indicator Light isn't green and headlights are flashing, check again that both sides of lid are locked in place.

Brushroll Maintenance

Carefully remove any debris that may be impeding the brushroll.

Soft Roller Maintenance

Lift out the Soft Roller by pulling the tab on the right side. Clear away any debris, then slide the Soft Roller back into place.

Checking the Nozzle for Blockages

Tilt neck of nozzle back to straighten the airway, then remove any blockages.
