# Get to know your stylers.

- 1 Auto-Wrap Curlers**  
*Hassle-free curls in seconds.*

  - Uses air power to automatically wrap hair around the barrel, from ends to roots
  - 2 curler barrels to create curls in both directions
- 2 Oval Brush**  
*Smooths & defrizzes, adds volume & bounce*

Smoothing bristles—on the rounded edge for grabbing, smoothing, and shining

Detangling bristles—in the middle for combing and detangling
- 3 Paddle Brush**  
*Straighten & smooth all at once*

Smoothing bristles—to create added tension for straightening, smoothing, and shining

Detangling bristles—for combing and detangling
- 4 Styling Concentrator**  
*Style & dry at the same time*

Rotates for easy styling
- 5 Curl-Defining Diffuser**  
*Fast, even drying from root to tip*

Use the lever to extend or retract the prongs for a customisable air flow

Extended prongs—for longer, thicker hair or reaching and lifting the roots

Retracted prongs—for shorter, finer hair or if the ends need a little extra air

Accessories may vary per model

**Cool Touch Locations**  
 Hold the Cool Touch location to remove the accessory after use.

# Change the way you curl.

Recommended Setting:  air  |  temp 

## Auto-Wrap Curlers

For even more help and tips based on your hair type, scan the QR code to watch the how-to video and to visit our FAQ page.

**Left Barrel**  
Counterclockwise  
Curl

Recommended  
for left side of head

**Right Barrel**  
Clockwise  
Curl

Recommended for  
right side of head

- 1 Begin with **80% - 90% dry hair**. Select the direction of the curls by choosing the corresponding barrel.

*Pro Tip:* Apply hair products or styling agents as desired.

- 2 Separate the top and bottom sections of your hair.

- 3 Hold a  $\frac{1}{2}$  - 1 inch section of hair 4 inches from the ends making sure to let the ends hang freely.

*Pro Tip:* Take a section that is even in length for best results.

- 4 Turn on the styling wand. Bring the wand behind the ends of the hair and let the ends wrap around the middle of the barrel automatically.

- 5 Once the ends wrap, let go of the hair section and slowly bring the barrel directly to the roots, allowing the hair to continue to wrap itself around the barrel. **No need to twist the wand.**

- 6 For best curling results and to avoid heat damage, hold the barrel in place for **10 seconds** then press the **Cool Shot button** for at least **10 seconds**. Repeat until hair is dry for best results. **Turn off the styling wand** and pull the barrel straight down to reveal your curl!

*Pro Tip:* Once the hair is removed from the barrel, use a setting or holding spray as desired for an even longer-lasting look.

### Additional Styling Tips:

- Take smaller sections if your hair is having difficulty wrapping around the barrel.
- Use sectioning clips to prevent unwanted hair from being wrapped around the barrel.
- Test different moisture levels to understand the level of moisture that works best for your hair type!
- For curly or coily hair, prep your hair for curling by lengthening it using the paddle brush.

# Turn up the volume.

Recommended Setting:  air  |  temp  

## Oval Brush

For additional help and tips based on your hair type, scan the QR code to watch the how-to video and to visit our FAQ page!

- 1 Begin by drying your hair until your hair is 80%-90% dry.

*Pro Tip:* Apply hair products or styling agents as desired.

- 2 Section your hair as desired to help build volume of the roots. For voluminous blow-drys, start by placing the round brush under the hair close to the roots.

*Pro Tip:* For extra volume, brush your hair in an upward direction.

- 3 Roll the brush outwards from the roots to the ends to engage the bristles and gently grip the hair.

*Pro Tip:* For an added curl, place the brush under the ends of the hair and roll the brush towards the roots to engage the bristles. Twist the hair off the brush to release the curl.

- 4 Finally, press the Cool Shot button to set your style.

*Pro Tip:* Use setting or holding spray as desired for an even longer-lasting look.

### Additional Styling Tips:

- If you have fine hair, try reducing the airflow to help cut down on frizz.
- If you have thick hair, try increasing the heat for even faster results.
- If you have curly or coily hair, try increasing the heat to help achieve a straighter style.
- For even volume at the roots, hold the brush under your hair close to the roots for 3 seconds before brushing outwards.

# Perfect sleek, straight styles.

Recommended Setting:  air  |   temp 

## Paddle Brush

For additional help and tips based on your hair type, scan the QR code to watch the how-to video and to visit our FAQ page!

**1** Begin with **80% dry hair**. For best results, **section your hair** as desired to help build volume at the roots.

**Pro Tip:** Apply hair products or styling agents as desired.

**2** For a smooth, sleek style, start by **placing the brush close to the roots** to engage the detangling bristles.

**3** Use a **rounding motion** as you brush down your hair to **engage the side smoothing bristles** and gently grip the hair.

**Pro Tip:** Hold the ends of your hair while brushing for added tension and smoothing.

**4** Repeat on remaining sections until hair has been dried into a smooth, straight style.

**Pro Tip:** Set your style and help reduce frizz by pressing the **Cool Shot button**.

### Additional Styling Tips:

- If you have fine hair, try reducing the airflow to help cut down on frizz.
- If you have thick hair, try brushing smaller sections for smoother results.
- If you have curly or coily hair, try repeatedly brushing smaller sections to help achieve a straighter style.
- For added volume, place the brush under the hair section close to the roots and brush upwards using a rounding motion.

# Master smooth, stylish blow-drys.

Recommended Setting:  air  |  temp 

## Styling Concentrator

For additional help and tips based on your hair type, scan the QR code to watch the how-to video and to visit our FAQ page!

- 1 Begin with **damp hair**. **Gentle-dry with the concentrator nozzle**, applying airflow from the roots to the ends.

**Pro Tip:** Apply hair products or styling agents as desired.

- 2 When excess moisture is gone, **section your hair** as desired and start styling with a round brush. **Rotate the concentrator** so airflow is always in line with the round brush.

- 3 **Apply heat in a downward motion** for smoothing.

**Pro Tip:** Apply heat at ends for shaping and bending.

- 4 Finish styling by setting shape at ends with **Cool Shot**.

### Additional Styling Tips:

- If you have fine hair, try reducing the airflow to help cut down on frizz.
- To create a curl, wrap your hair around a round brush and dry it in place using the concentrator.
- For added volume, place a round brush under the roots and brush upwards while drying with the concentrator.
- For an added curl at the ends, roll the ends of the hair onto a round brush and dry in place using the concentrator.

# Define your natural curls.

Recommended Setting:  air  |  temp 

## Curl-Defining Diffuser

For additional help and tips based on your hair type, scan the QR code to watch the how-to video and to visit our FAQ page!

1 Begin with **damp hair**. Working around your head, bunch curls from ends between the petals of the diffuser.

**Pro Tip:** Apply curly hair products or styling agents as desired to wet hair.

2 Bring the diffuser up to the roots. Pause and hold.

3 For more volume, slide the lever to **extend prongs to lift roots higher**.

**Pro Tip:** Gather hair in diffuser with prongs retracted, then extend them when you reach the roots to increase grab and maximise flow.

4 If desired, **flip upside down and bunch from below** for extra curl and volume.

**Pro Tip:** Keep the integrity of your natural curls by switching between Low temp and the **Cool Shot** button.

### Additional Styling Tips:

- Apply curly hair products to wet hair before drying to help define your curls and cut down on frizz.
- If you have thick hair, try increasing the heat for even faster results.
